

Be a part of a child's future

Thoughts from our children who have been adopted in Sefton.....

Being adopted means you are cared for"

How would you describe adoption?

"If there are other children in the family you all get treated the same"

"When you are with your adoptive family it just feels normal"

"I wanted to stay at the edge of the room and wanted to stay with my foster carers"

How I felt when I first came...

What we feel about adoption..

"You get new family members"

"I am happy that I have been adopted... I tell some of my friends but not all of them"

How do you feel about talking about adoption?

What is good about being adopted?

"When you talk about it you realise that it is good to talk about adoption"

"We enjoy the activities because we are all the same"

What do you think about getting together with other children who are adopted?
